

VERTIV™

Avocent® SV Switching System KM Tools Utility

Release Notes for SV 200/300 and SV KM 100 Series Switches

VERSION 3.2, APRIL 22, 2020

Installing the KM Tools Utility

The KM Tools utility is a web-based tool that allows system administrators to define custom display configurations that can be loaded on Vertiv™ Avocent® SV 200/300 series or SV KM 100 series switches. This utility allows administrators to define the number of displays connected to each computer, each display size and resolution, and the arrangement of the displays. See the installer/user guide that accompanies your switch for more information on supported features.

The utility operates only with Microsoft Windows XP or later and supports the following browsers:

- Google Chrome 20.0 or higher
- Microsoft Internet Explorer
- Mozilla Firefox

To install the driver:

1. Unzip the *Vertiv_KM_Tools_Setup-3.2.zip* file.
2. Select the *Vertiv_KM_Tools_Setup-3.2.exe* file to begin utility installation.
