VERTIV™

Avocent® SV Switching System Driver for Multi-Display Support

Release Notes for SV 200/300 and SV KM 100 Series Switches

VERSION 3.1, JANUARY 14, 2019

Installing the Driver for Multi-Display Support

The Vertiv™ Avocent® SV switching system is preconfigured to support one display per channel. However, if you wish to leverage a multiple display configuration for the SV 200/300 series or SV KM 100 series switches, you must install this driver on each Windows computer. See the installer/user guide that accompanies your switch for more information on supported features.

NOTE: This driver is currently only available for Microsoft Windows.

To install the driver:

1. Unzip the Vertiv_KM_Multi_Display_Setup-3.1.zip file.
2. Select the *Vertiv_KM_Multi_Display_Setup-3.1.exe* file to begin driver installation.
3. Run the .exe file on each multi-display Windows computer connected to the switch.
