# VERTIV™

## Cybex™ SC Switching System
## KM Tools Utility

Release Notes for SC 800/900, SCM 100 and SC KM 100 Series Switches

### VERSION 3.1, JANUARY 14, 2019

### Installing the KM Tools Utility

The KM Tools utility is a web-based tool that allows system administrators to define custom display configurations that can be loaded on Vertiv™ Cybex™ SC 800/900, SCM 100 or SC KM 100 series switches. This utility allows administrators to define the number of displays connected to each computer, each display size and resolution, and the arrangement of the displays. See the installer/user guide that accompanies your switch for more information on supported features.

The utility operates only with Microsoft Windows XP or later and supports the following browsers:

- Google Chrome 20.0 or higher
- Microsoft Internet Explorer
- Mozilla Firefox

To install the driver:

1. Unzip the Vertiv_KM_Tools_Setup-3.1.zip file.
2. Select the *Vertiv_KM_Tools_Setup-3.1.exe* file to begin utility installation.
