Note: The only language supported is English.

=====

Features

=====

Cyclades Console Server v1.0.0 is Avocent's serial product option for the small and medium business (SMB) market. It allows access to all computer room serial devices from a single access point, either from a local port or remotely via TCP/IP and dial up. This access simplifies and consolidates the serial access for ease management and time saving whether in the office or remotely after hours.

Major features for Cyclades CS v1.0.0 include:

- Linux based operating system for stability
- Secure local (console port) and remote (IP and dial up) accessibility
- 8 and 16 serial ports appliances
- Support to remote authentication services
- Solid security to ensure data integrity and support to RFC2217
- Local and remote data logging
- System and port event notification (email, pager, SNMP trap)
- Simultaneous sessions and simultaneous access to the same serial port
- Web interface for access and configuration (HTTP/HTTPS)
- Command line interface (Linux shell)
- DHCP for dynamic IP assignment
- PPP/SLIP for dial-up
- Global time zone support and NTP client for time synchronization
- CAT 5 compatible adapters for simpler cabling
- Flash upgradeable (from FTP site)
