

Vertiv™ Avocent® SV Series Switches Driver for Multi-Display Support

Release Notes for SV200/300, SVM100, SVKM100 and SVMV200 Series Switches

VERSION 1.0, JANUARY 2022

Installing the Driver for Multi-Display Support

The Vertiv™ Avocent® SV series switches are preconfigured to support one display per channel. However, if you wish to leverage a multiple display configuration for the Vertiv™ Avocent® SV200/300, SVM100, SVKM100 or SVMV200 series switches, you must install this driver on each Windows computer. See the installer/user guide that accompanies your switch for more information on supported features.

NOTE: This driver is currently only available for Microsoft Windows.

To install the driver:

1. Unzip the Vertiv_Multi_Display_Setup-1.0.zip file.
2. Select the *Vertiv_Multi_Display_Setup-1.0.exe* file to begin driver installation.
3. Run the .exe file on each multi-display Windows computer connected to the switch.
